(Formerly Aumento Capital V Corporation) NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

Three and six month periods ended June 30, 2017 (Unaudited - Expressed in Canadian Dollars)

1. Nature of Operations

WeedMD Inc. ("WeedMD"), formerly Aumento Capital V Corporation ("Aumento"), is a publicly listed company on the TSX Venture Exchange that trades under the ticker symbol "WMD". The registered and head office of the Company is located at 250 Elm Street, Aylmer, Ontario.

The consolidated financial statements of WeedMD Inc. as at June 30, 2017 comprise of WeedMD Inc. and its wholly owned subsidiaries: WeedMD Rx Inc., WeedMD Rx Ltd. and WMD Ventures Inc. (collectively, the "Company").

WeedMD Rx Inc. was incorporated on March 26, 2013 under the Canada Business Corporations Act as 8472106 Canada Inc. On January 7, 2014, the Company filed its articles of amendment, changed its name to WeedMD Rx Inc. and commenced operations. On April 22, 2016, WeedMD was licensed to produce medical cannabis under the federal Access to Cannabis for Medical Purposes Regulations ("ACMPR").

WeedMD operates a 25,620 sq. ft. former Imperial Tobacco facility in Aylmer, Ontario, which it has retrofitted into a secure medical cannabis production facility with an annual production capacity in excess of 1,200 kg. The Company operates in one sector: the production and sale of medical cannabis. All of its assets and operations are located in Canada.

On April 13, 2017, the Company completed a transaction by way of a three-cornered amalgamation (the "Amalgamation") among WeedMD Rx Inc., WeedMD Inc., and a wholly-owned subsidiary of the Company (the "Transaction"). The Transaction resulted in the acquisition by the Company of all the issued and outstanding securities in the capital of WeedMD, which became a wholly - owned subsidiary of the Company. As part of the Transaction, the Company changed its name from "Aumento Capital V Corporation" to "WeedMD Inc."

Pursuant to the Transaction, the shareholders of WeedMD were issued 1.25 common shares in the Company for each common share of WeedMD registered in the names of such shareholders. Additionally, holders of WeedMD's options and warrants outstanding at the time of closing the Transaction also received equivalent instruments of the Company exercisable for or convertible into the Company's common shares.

On April 28, WeedMD was issued a renewal to its ACMPR license, valid until April 24, 2020. At the same time WeedMD received an amendment to its license allowing for the sale and distribution of dried cannabis and live cannabis plants. At the end of the license term, WeedMD will submit for a further renewal. WeedMD has no information that would lead it to believe that the license would not be renewed again at that time.

Furthermore, under the amended license, the amount of cannabis that WeedMD is permitted to produce and store is limited only by the capacity of the vault it has built onsite. As WeedMD's vault is considered a level "10" vault by Health Canada standards, this limit is \$150 million.

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards on a going concern basis which assumes that the Company will continue to operate for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. The Company has financed its working capital requirements primarily through equity and debt financings. The Company's ability to continue as a going concern is dependent upon its ability to commence profitable operations, generate positive cash flows from operations and raise additional financing in order to meet current and future obligations. While the Company has been successful in raising financing in the past, there is no assurance that it will be able to obtain additional financing or that such financing will be available on reasonable terms.

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

Three and six month periods ended June 30, 2017 (Unaudited - Expressed in Canadian Dollars)

1. Nature of Operations (continued)

These consolidated financial statements do not include any adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue as a going concern.

2. Financial Statements

Basis of presentation

The condensed interim consolidated financial statements have been prepared on a historical cost basis except for certain financial instruments which are measured at fair value, as explained in the accounting policies set out in Note 5.

Basis of consolidation

The financial statements of subsidiaries are included in the condensed interim consolidated financial statements from the date that control commences until the date control ceases. WeedMD Rx Inc. is a wholly-owned subsidiary of WeedMD. WMD Ventures Inc. and WeedMD Rx Ltd. are 100% subsidiaries of WeedMD Rx Inc. and are currently inactive.

The functional currency of the Company and its subsidiaries is the Canadian Dollar, which is also the presentation currency of the condensed interim consolidated financial statements.

Intercompany balances and transactions, and unrealized gains arising from intercompany transactions are eliminated in preparing the condensed interim consolidated financial statements.

3. Statement of Compliance

These condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standard 34 *Interim Financial Reporting* ("IAS 34"). The financial statements should be read in conjunction with the audited annual financial statements of WeedMD for the years ended December 31, 2016 and 2015, which have been prepared in accordance with International Financial Reporting Standards ("IFRS").

These condensed interim consolidated financial statements were approved by the Board of Directors for issuance on August 29, 2017.

4. New Accounting Standards and Interpretations

(a) IFRS 15 Revenue from Contracts with Customers

IFRS 15 was issued by the IASB in May 2014 and specifies how and when revenue should be recognized based on a five-step model, which is applied to all contracts with customers. IFRS 15 becomes effective for annual periods beginning on or after January 1, 2018 with early adoption permitted.

(b) IFRS 9 Financial Instruments ("IFRS 9")

IFRS 9 was issued by the International Accounting Standards Board ("IASB") in November 2009 and October 2010 and will replace IAS 39. IFRS 9 covers classification and measurement as the first part of its project to replace IAS 39. In October 2010, the IASB also incorporated new accounting requirements for liabilities. The standard introduces new requirements for measurement and eliminates the current classification of loans and receivables, available-for-sale and held-to-

maturity, currently in IAS 39. There are new requirements for the accounting of financial liabilities as well as a carryover of requirements from IAS 39. In 2013, the IASB also incorporated new accounting requirements for hedging and introduced a new expected-loss impairment model that will require more timely recognition of expected credit losses. Specifically, the new standard requires entities to account for expected credit losses from when financial instruments are first recognized and to recognize full lifetime expected losses on a timelier basis. The effective date of this pronouncement has been set to be effective for annual periods beginning on or after January 1, 2018. The Company intends to adopt the amendments to IFRS 9 in its financial statements for the annual period beginning January 1, 2018.

(c) Amendments to IAS 16 Property, Plant and Equipment and IAS 41 Agriculture

IAS 16 and IAS 41 are amended to:

Include 'bearer plants' within the scope of IAS 16 rather than IAS 41, allowing such assets to be accounted for as property, plant and equipment and measured at initial recognition on a cost or revaluation basis in accordance with IAS 16;

Introduce a definition of 'bearer plants' as a living plant that is used in the production or supply of agricultural produce, is expected to bear produce for more than one period and has a remote likelihood of being sold as agricultural produce, except for incidental scrap sales; and clarify that produce growing on bearer plants remains within the scope of IAS 41.

This amendment was adopted by the Company for the year ended December 31, 2016 and had no impact.

(d) Disclosure Initiative (Amendments to IAS 1)

Amends IAS 1 Presentation of Financial Statements to address perceived impediments to preparers exercising their judgement in presenting their financial reports by making the following changes:

Clarification that information should not be obscured by aggregating or by providing immaterial information, materiality considerations apply to all parts of the financial statements, and even when a standard requires a specific disclosure, materiality considerations do apply;

Clarification that the list of line items to be presented in these statements can be disaggregated and aggregated as relevant and additional guidance on subtotals in these statements and clarification that an entity's share of the other comprehensive income ("OCI") of equity-accounted associates and joint ventures should be presented in aggregate as single line items based on whether or not it will subsequently be reclassified to profit or loss; and

Additional examples of possible ways of ordering the notes to clarify that understandability and comparability should be considered when determining the order of the notes and to demonstrate that the notes need not be presented in the order so far listed in paragraph 114 of IAS 1.

This amendment was adopted by the Company for the year ended December 31, 2016 and had no impact.

4. New Accounting Standards and Interpretations (continued)

(e) IFRS 16 Leases

IFRS 16, Leases ("IFRS 16") was issued in January 2016, and supersedes IAS 17, Leases. This standard introduces a single lessee accounting model. The new standard will reflect the initial present value of unavoidable future lease payments as lease assets and lease liabilities on the statement of financial position, including for most leases which are currently accounted for as operating leases.

The Standard is effective for annual periods beginning on or after January 1, 2019, with earlier adoption permitted.

(f) IAS7 Statement of Cash Flows

In January, 2016, the IASB issued the disclosure initiative amendments to IAS 7, statement of cash flow. The amendment will require entities to provide disclosures that enable users of the financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash and non-cash changes.

The Company has not yet completed its evaluation of the effect of adopting the above standards and amendments and the impact they may have on its consolidated financial statements.

This amendment is applicable to annual periods beginning on or after January 1, 2017.

5. Significant Accounting Policies

The accounting policies applied by the Company in these Condensed Interim Consolidated Financial Statements are the same as those applied by the Company in its Consolidated Financial Statements for the year ended December 31, 2016 except for updates made to the following:

Revenue recognition

Revenue is recognized at the fair value consideration received or receivable. Revenue from the sale of goods is recognized when the Company has transferred the significant risks and rewards of ownership to the buyer and it is probable that the Company will receive the previously agreed upon payment. Significant risks and rewards are generally considered to be transferred when the Company has shipped the product to customers.

Biological assets

Valuation of biological assets and inventories: biological assets consisting of cannabis plants are measured at fair value less costs to sell up to the point of harvest. Determination of the fair values of the biological assets requires the Company to make assumptions about how market participants assign fair values to these assets. These assumptions primarily relate to the level of effort required to bring the cannabis plants up to the point of harvest, costs to convert the harvested plants to finished goods, sales price, risk of loss, expected remaining future yields for the plants, and estimating values during the growth cycle. The valuation of biological assets at the point of harvest is the cost basis for all cannabis based inventory and thus any critical estimates and judgements related to the valuation of biological assets are also applicable for inventory. The valuation of work in process and finished goods also requires the estimate of conversion costs incurred, which become part of the carrying amount for the inventory. The Company must also determine if the cost of any inventory exceeds its net realizable value, such as cases where prices have decreased, or inventory has spoiled or has otherwise been damaged.

6. Qualifying Transaction

On April 13, 2017, WeedMD Inc. completed a transaction by way of a three-cornered amalgamation (the "Amalgamation") of WeedMD Rx Inc. and WeedMD Inc. (formerly Aumento Capital V Corporation (the "Transaction"). The Transaction consisted of the acquisition by the Company of all of the issued and outstanding securities in the capital of WeedMD Rx Inc. by way of a three-cornered amalgamation, pursuant to which a wholly-owned subsidiary of the Company amalgamated with WeedMD Rx Inc.

Pursuant to the Transaction, each WeedMD Rx Inc. shareholder received 1.25 common shares in the capital of the Company for each WeedMD Rx Inc. common share held, resulting in the issuance of an aggregate of 58,577,376 common shares of the Company to shareholders of WeedMD Rx Inc. As part of the Transaction, warrants, compensation options and stock options of WeedMD Rx Inc. were replaced with common share purchase warrants, compensation options and stock options of the Company with adjustments to their exercise or conversion terms to reflect the exchange ratio for the WeedMD Rx Inc. common shares under the Transaction, resulting in the issuance of: (i) common share purchase warrants exercisable to purchase up to 14,888,486 common shares at an exercise price of \$0.80 per share; (ii) stock options exercisable to purchase up to 3,312,500 common shares at an exercise price of \$0.60 per share; and (iii) 440,000 compensation options exercisable into units at an exercise price of \$0.60 per unit, with each unit comprised of a common share and one-half of one warrant, with each whole warrant exercisable into a common share at an exercise price of \$0.80 per share.

As part of the Transaction, the Company changed its name from "Aumento Capital V Corporation" to "WeedMD Inc.".

As a result of the Transaction, WeedMD Rx Inc. is now a wholly-owned subsidiary of the Company. The Company will continue the business of WeedMD Rx Inc. which is licensed under the Access to Cannabis for Medical Purposes Regulations ("ACMPR") to produce and sell dried cannabis and live cannabis plants, as well as to produce cannabis oil, from its facilities located in Aylmer, Ontario.

Prior to the Transaction, Aumento Capital V Corporation was a Capital Pool Company (as defined under the policies of the TSX Venture Exchange (the "Exchange"), had not commenced commercial operations and had no assets other than cash. The Transaction constituted Aumento Capital V Corporation 's "Qualifying Transaction", as such term is defined in Policy 2.4 of the Exchange.

Immediately following the completion of the Transaction (on a post-acquisition basis), the Company had a total of 60,517,058 common shares outstanding, as well as: (i) common share purchase warrants exercisable to purchase up to 14,888,486 common shares at an exercise price of \$0.80 per share; (ii) stock options exercisable to purchase up to 3,497,332 common shares at exercise prices ranging from \$0.60 - \$0.80 per share; (iii) 440,000 compensation options exercisable into units at an exercise price of \$0.60 per unit, with each unit comprised of a common share and one warrant, with each warrant exercisable into a common share at an exercise price of \$0.80; and (iv) 1,125,000 common shares issuable to certain officers of the Company upon WeedMD Rx Inc. receiving its Sales License (the "Compensation Shares").

An aggregate of 23,388,441 common shares are subject to escrow pursuant to Exchange escrow requirements (not including the Compensation Shares which will also become subject to escrow upon issuance).

8. Biological Assets and Inventory

The Company's biological assets consists of medical cannabis plants.

The change in the carrying value of the Company's biological assets are as follows:

Carrying amount, January 1, 2017 Changes in fair value less costs to sell due to biological	\$ 598,755
transformation	1,011,526
Transferred to inventory upon harvest	(801,069)
Carrying amount, June 30, 2016	\$ 809,212

All of the plants are to be harvested as agricultural produce (i.e. medical cannabis). All of the plants are between one and twelve weeks from harvest.

Biological assets are classified as level 3 in the fair value hierarchy. There have been no transfers between levels. The significant assumptions used in determining the fair value of medical cannabis plants are as follows:

- Wastage of plants based on their various stages;
- Yield by plant;
- Percentage of costs incurred to date compared to the total costs to be incurred are used to estimate the fair value of an in-process plant;
- Selling price: and
- Percentage of costs incurred for each stage of plant growth was estimated.

The Company estimates the harvest yields for the plants at various stages of growth. As of June 30, 2017, it is expected that the Company's biological assets will yield approximately 320,682 grams, based on selling price assumptions ranging from \$3.00 to \$6.00 per gram (December 31, 2016: \$3.50 to \$8.00 per gram), before discounts. The Company's estimates are, by their nature, subject to change. Changes in the anticipated yield will be reflected in future changes in the gain or loss on biological assets. The Company performed a sensitivity analysis on the fair value of biological assets and note that a 10% decrease in selling prices would result in a \$162,024 decrease (December 31, 2016: \$108,259 decrease) in the fair value of the biological assets.

Inventory is comprised of harvested finished goods and is valued at the lower of cost and net realizable value. As at June 30, 2017 the Company held 428,381 grams (December 31, 2016: 91,391 grams) of dried cannabis.

On November 8, 2016, WeedMD closed a \$7,600,000 convertible debenture unit financing (the "Convertible Debenture Financing") with a syndicate of agents (the "Agents"). Pursuant to the Convertible Debenture Financing, WeedMD has issued 7,600 units (the "Units"), with each Unit comprised of one debenture (a "Debenture") with a principal amount of \$1,000 and 1,333 common share purchase warrants (the "Warrants") with a term of six months.

The Debentures were to mature on May 8, 2017 and accrue interest at a rate of 10% per annum; provided such interest would only be paid in the event WeedMD failed to complete a Liquidity Event. A "Liquidity Event" means a transaction by way of a plan of arrangement, amalgamation, reverse takeover, qualifying transaction, or any other business combination or other similar transaction pursuant to which the commons shares of WeedMD are listed on the TSX Venture Exchange, the Canadian Securities Exchange or any other exchange as mutually agreed upon by the Company and the Agents. In the event of a Liquidity Event, the principal amount of the Debentures was convertible at the election of the holders at a conversion ratio of 1.333 common shares of WeedMD per \$1,000 principal amount of Debentures (conversion price of \$0.75 per share). All Debentures that remain outstanding immediately prior to the Liquidity Event were to be automatically converted by the Company into common shares of WeedMD and in no event were holders of Debentures entitled on the completion of a Liquidity Event to be repaid the principal amount of the Debentures in cash. The fair value of the liability component at the time of issue was calculated as the discounted cash flows for the Debentures assuming a market interest rate of 30% which was the estimated rate for the Debentures without the equity component (conversion feature and warrants). The effective interest rate of the Debenture after reflecting issuance costs is 62%. As the Liquidity Event was successfully completed, no interest was paid on the Debentures.

A total of 10,130,800 warrants were issued and the warrants are exercisable into 10,130,800 common shares of WeedMD at an exercise price of \$1.00 per share for a period of two years from the completion of a Liquidity Event by WeedMD. The value of the warrants and the conversion feature attached to the Debentures were recognized as the difference between the value of the Units and the fair value of the liability component of the Debentures.

11. Convertible debentures (continued)

The relative fair values of the warrants and the conversion feature, \$383,128 and \$213,141, respectively, were determined at the time of issue based on the Black-Scholes option pricing model. The warrant value was determined using the following assumptions in the Black-Scholes option pricing model: (i) share price \$0.75, (ii) dividend yield 0%, (iii) expected volatility 101%, (iv) risk free interest rate of 0.58%, (v) expected forfeiture rate 0%, and (vi) an expected life of two years. The conversion feature value was determined using the following assumptions in the Black-Scholes option pricing model: (i) share price \$0.75, (ii) dividend yield 0%, (iii) expected volatility 92%, (iv) risk free rate of 0.58%, (v) expected forfeiture rate 0%, and (vi) an expected life of six months.

In connection with the Convertible Debenture Financing, the Company paid expenses and commissions of \$753,316 in cash and issued 352,000 compensation options to the Agents which are convertible into units for a period of two years following the liquidity event at an exercise price of \$0.75 per unit, with each unit comprised of one common share and one common share purchase warrant, each warrant convertible into a common share for a period of two years at an exercise price of \$1.00 per share. The fair value of the compensation options was estimated at \$385,000 with reference to the Black-Scholes option pricing model (refer to Note 13). The fair value of the compensation options is included in the Company's contributed surplus. The cash transaction costs and compensation options are directly attributable transaction costs and have been allocated to the liability and equity components in proportion to their initial carrying amounts.

On April 13, 2017, the Debentures were fully converted into 10,133,333 common share of the Company. (Note 12).

17. Financial Instruments

Transactions in financial instruments may result in an entity assuming or transferring to another party one or more of the financial risks described below. The required disclosures provide information that assists users of financial statements in assessing the extent of risk related to financial instruments.

(a) Fair value

The fair value of current financial assets and current financial liabilities approximates their carrying value due to their short-term maturity dates. The Company does not have long term liabilities as at June 30, 2017 and 2016.

(b) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises the following types of risk: credit risk, foreign exchange risk, liquidity risk and cash flow risk. The company is exposed to interest rate risk on its interest bearing Debentures which is limited due to the short-term nature of the loans, all of which have been automatically converted by the Company into common shares.

(c) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations.

The Company is not exposed to any significant credit risk other than loans receivable. Cash is generally invested in cash accounts held in Canadian chartered banks. The Company's loans receivable disclosed in Note 7 was collected in full subsequent to year-end. Management believes the risk of loss associated with these assets to be remote. Management believes that the credit

17. Financial Instruments (continued)

risk concentration with respect to financial instruments included in assets has been reduced to the extent presently practicable.

(d) Foreign exchange risk

The Company is exposed to foreign exchange risk in United States dollars. Foreign exchange risk is the risk that the exchange rate that was in effect on the date that an obligation in a foreign currency was made to the Company by a customer or lender, or that an obligation in a foreign currency was made to the Company to a supplier or partner, is different at the time of settlement than it was at time that the obligation was determined. The Company reduces its exposure to foreign exchange risk by carefully monitoring exchange rates on obligations that are made to the Company. The Company did not have any hedges at the time that the financial statements were issued. The Company does not utilize financial instruments to manage its foreign exchange risk. In the opinion of management, the foreign exchange risk exposure to the Company is low and is not material. As at June 30, 2017 and December 31, 2016, the Company held cash and cash held in trust in US dollars of \$11,930 and \$34,544 respectively. A 10% change in foreign exchange rates would impact net loss by approximately \$1,193.

(e) Liquidity risk

The Company does have a liquidity risk in the accounts payable and accrued liabilities of \$713,786 which are due within one year. Liquidity risk is the risk that the Company cannot repay its obligations when they become due to its creditors. The Company reduces its exposure to liquidity risk by ensuring that it documents when authorized payments become due; maintains an adequate working capital to repay trade creditors as they become due. In the opinion of management the liquidity risk exposure to the Company is low.

(f) Cash flow risk

Cash flow risk is the risk that future cash flows associated with a monetary financial instrument will fluctuate in amount, such as a debt instrument held with a floating interest rate. In the opinion of management, the cash flow risk exposure to the Company is low.

18. Capital Management

The Company includes equity, comprised of common shares, contributed surplus and deficit, in the definition of capital. The Company's objectives when managing capital are as follows:

- (i) To safeguard the Company's assets and ensure the Company's ability to continue as a going concern; and
- (ii) To raise sufficient capital to achieve the ongoing business objectives including funding of future growth opportunities and meeting its general and administrative expenditures.

The Company manages its capital structure and makes adjustments to it, based on the general economic conditions, the Company's short-term working capital requirements, and its planned capital requirements and strategic growth initiatives.

The Company's principal source of capital is from the issuance of common shares. In order to achieve its objectives, the Company expects to spend its working capital, when applicable, and raise additional funds as required.

The Company does not have any externally imposed capital requirements.
