# 1. Nature of operations

Maricann Group Inc. ["Maricann" or the "Company"] was continued under the laws of the Province of Ontario, Canada. The Company's shares are listed on the Canadian Securities Exchange [the "Exchange"] under the symbol "MARI" and on the OTCMKTS under the symbol "MRRCF". The Company is the resulting entity following the April 20, 2017 reverse takeover transaction between Maricann Inc. and Maricann Group Inc., formerly Danbel Ventures Inc. ["Danbel"], whereby Maricann Inc. was amalgamated with a wholly-owned subsidiary of Danbel and all the shares of Maricann Inc. were exchanged for shares of Danbel and the resulting entity became known as Maricann Group Inc. See Note 3.

The Company's wholly-owned subsidiary, Maricann Inc. is licensed to produce and sell medical marijuana under the Access to Cannabis for Medical Purposes Regulation [the "ACMPR"]. Maricann Inc. received its first license from Health Canada under the Marijuana for Medical Purposes Regulations on March 27, 2014. Maricann Inc. received an updated license [the "License"] under the ACMPR on November 8, 2017, which expires on October 9, 2020. On September 5, 2017, Maricann Inc. received a second site license for its Burlington location. On April 20, 2018, Maricann Inc. received its third site license for its 138 8th Concession Road, Langton, Ontario location. The Company's head office, registered and records office is located at 3-845 Harrington Court, Burlington, Ontario, L7N 3P3. The Company's operating production address is 150 8th Concession Road, Langton, Ontario, NOE 1G0. On April 20, 2018, Maricann Inc. received its third site license for its 138 8th Concession Road, Langton, Ontario location.

### 2. Basis of presentation

#### Statement of compliance

These condensed interim consolidated financial statements have been prepared by management in accordance with generally accepted accounting principles in Canada for publicly accountable enterprises, as set out in the *CPA Canada Handbook – Accounting*, which incorporates International Financial Reporting Standards ["IFRS"] as issued by the International Accounting Standards Board ["IASB"] using International Accounting Standard 34, Interim Financial Reporting ["IAS 34"]. The policies set out below have been consistently applied to all periods presented unless otherwise noted.

These condensed interim consolidated financial statements do not include all of the information required for full annual financial statements and should be read in conjunction with the Company's audited financial statements as at and for the year ended December 31, 2017.

These condensed interim consolidated financial statements were approved and authorized for issuance by the Board of Directors of the Company on August 23, 2018.

# **Basis of consolidation**

These condensed interim consolidated financial statements include the accounts of the Company and its subsidiaries, Maricann Inc. [wholly-owned], Maricann B.V. [wholly-owned], Nanoleaf Technologies Inc. [wholly-owned], Haxxon AG [wholly-owned], Mariplant GmbH [95% owned] and Maricann GmbH [95% owned]. All significant intercompany balances and transactions were eliminated on consolidation. Subsidiaries are entities the

Company controls when it is exposed, or has rights, to variable returns from its involvement in the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity.

These condensed interim consolidated financial statements are presented in Canadian dollars unless otherwise noted. The functional currency of Maricann B.V., Mariplant GmbH and Maricann GmbH is the European Euro, the functional currency of Haxxon AG is the Swiss Franc and the functional currency of Maricann and its remaining subsidiaries is the Canadian dollar.

Foreign currency transactions are translated into Canadian dollars at exchange rates in effect on the date of the transactions. Monetary assets and liabilities denominated in foreign currencies at the consolidated statement of financial position dates are translated into Canadian dollars at the foreign exchange rate applicable at that date. Realized and unrealized exchange gains and losses are recognized through profit or loss. Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction. The assets and liabilities of foreign operations are translated into Canadian dollars at year-end exchange rates. Revenue and expenses, and cash flows of foreign operations are translated into Canadian dollars using average exchange rates. Exchange differences resulting from translating foreign operations are recognized in other comprehensive loss and accumulated in shareholders' equity.

#### **Basis of measurement**

These condensed interim consolidated financial statements have been prepared on a historical cost basis except for biological assets, which are measured at fair value, as explained in the accounting policies below. Historical cost is generally based upon the fair value of the consideration given in exchange for the goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these condensed interim consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of IFRS 2, Share-based payments and measurements that have some similarities to fair value but are not fair value, such as net realizable value in IAS 2, Inventories or value in use in IAS 36, Impairment of Assets.

# Use of judgments, estimates and assumptions

The preparation of the condensed interim consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, revenue and expenses. Actual results may differ from these estimates.

Estimates are based on management's best knowledge of current events and actions that the Company may undertake in the future. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

# Notes to the condensed interim consolidated financial statements

[Unaudited, expressed in Canadian dollars unless otherwise noted]

Three and six months ended June 30, 2018 and 2017

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year:

Valuation of the fair value less costs to sell of biological assets and agricultural produce

Biological assets, consisting of medical cannabis plants and agricultural produce, are measured at fair value less costs to sell up to the point of harvest. The determination of the fair values of the biological assets requires the Company to make assumptions with respect to how market participants would estimate fair value. These assumptions primarily relate to the level of effort required to bring the biological assets up to the point of harvest, costs to convert the harvested medical cannabis to finished goods and sell, sales price, risk of loss and expected yield from the medical cannabis plants.

Useful lives and impairment of property, plant and equipment

Depreciation of property, plant and equipment is dependent upon management's estimate of the assets' useful lives, which requires judgment. The assessment of any impairment of these assets is dependent upon estimates of recoverable amounts that take into account factors such as economic and market conditions and the useful lives of these assets.

Share-based compensation

In calculating the share-based compensation expense, key estimates such as the value of the common shares, the rate of forfeiture of options granted, the expected life of the option, the volatility of the value of the Company's common shares and the risk-free interest rate are used.

Convertible debentures and warrants (issued in 2016)

The Company determined that the convertible debentures and warrants issued on December 15, 2016 did not meet the IFRS definition of equity due to the variability of the convertible debentures conversion ratio and the number of shares issuable on exercise of warrants if the Company fails to go public by a specified date. The convertible debenture conversion ratio and number of shares issuable on exercise of the warrants adjusts by 10% in this circumstance. Accordingly, the convertible debentures and warrants are treated as financial liabilities measured at fair value through profit or loss. The fair values of the convertible debentures and warrants are classified as Level 3 in the fair value hierarchy. Given the convertible debentures and warrants were issued shortly before year end, their issue price was considered the best estimate of fair value at December 31, 2016.

• Convertible debentures and warrants (issued in 2017)

The Company determined that the convertible debentures and warrants issued on October 27, 2017 [note 11] comprised of a compound financial instrument and warrant equity instruments. IFRS requires the proceeds from such issuances to be bifurcated between their liability and equity components. The Company first allocates the proceeds of such issuances to the convertible debentures and warrants based on the fair

# Notes to the condensed interim consolidated financial statements

[Unaudited, expressed in Canadian dollars unless otherwise noted]

Three and six months ended June 30, 2018 and 2017

values of these instruments, with the amount allocated to warrants included within shareholders' equity as Warrants. The proceeds allocated to the convertible debentures are then further allocated between financial liability and the equity conversion feature by determining the fair value of the financial liability and applying the residual to the equity conversion feature. The determination of such allocations involves the use of estimates.

#### Convertible instruments

Convertible notes are compound financial instruments which are accounted for separately by their components: a financial liability and an equity instrument. The financial liability, which represents the obligation to pay coupon interest on the convertible notes in the future, is initially measured at its fair value and subsequently measured at amortized cost. The residual amount is accounted for as an equity instrument at issuance. The identification of convertible notes components is based on interpretations of the substance of the contractual arrangement and therefore requires judgment from management. The separation of the components affects the initial recognition of the convertible debenture at issuance and the subsequent recognition of interest on the liability component. The determination of the fair value of the financial liability is also based on a number of assumptions, including contractual future cash flows, discount rates and the presence of any derivative financial instruments.

#### Business combinations and asset acquisitions

Classification of an acquisition as a business combination or an asset acquisition depends on whether the assets acquired constitute a business, which can be a complex judgement. Whether an acquisition is classified as a business combination or asset acquisition can have a significant impact on the entries made on and after acquisition. [Note 9]

In a business combination, all identifiable assets, liabilities and contingent liabilities acquired are recorded at their fair values. One of the most significant estimates relates to the determination of the fair value of these assets and liabilities. The contingent consideration is measured at its acquisition-date fair value and included as part of the consideration transferred in a business combination. Contingent consideration that is classified as equity is not remeasured at subsequent reporting dates and its subsequent settlement is accounted for within equity. Contingent consideration that is classified as an asset or a liability is remeasured at subsequent reporting dates in accordance with IAS 39, or IAS 37 Provisions, Contingent Liabilities and Contingent Assets, as appropriate, with the corresponding gain or loss being recognized in profit or loss. For any intangible asset identified, depending on the type of intangible asset and the complexity of determining its fair value, an independent valuation expert or management may develop the fair value, using appropriate valuation techniques, which are generally based on a forecast of the total expected future net cash flows. The evaluations are linked closely to the assumptions made by management regarding the future performance of the assets concerned and any changes in the discount rate applied.

Certain fair values may be estimated at the acquisition date pending confirmation or completion of the valuation process. Where provisional values are used in accounting for a business combination, they may be adjusted retrospectively in subsequent periods. However, the measurement period will last for one year from the acquisition date.

# Notes to the condensed interim consolidated financial statements

[Unaudited, expressed in Canadian dollars unless otherwise noted]

Three and six months ended June 30, 2018 and 2017

The initial measurement of assets acquired and liabilities assumed in an asset acquisition is determined based on an allocation of the purchase consideration, which can be comprised of cash or cash equivalents and the fair value of other consideration given to acquire the asset at the time of its acquisition. In the event that the consideration includes share-based consideration, the Company considers the specific requirements of IFRS 2, Share-based payments ("IFRS 2"). Contingent consideration, if any, is measured at its acquisition date fair value and included as part of the consideration transferred in acquiring the asset. Contingent consideration that is classified as equity is not remeasured at subsequent reporting dates and its subsequent settlement is accounted for within equity. Contingent consideration that is classified as a liability is remeasured at subsequent reporting dates in accordance with IAS 39, or IAS 37, as appropriate, with the corresponding gain or loss being recognized in profit or loss. Determining the fair value of contingent consideration requires management to make certain estimates.

#### Intangible assets, other than goodwill

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. The cost of intangible assets acquired in an asset acquisition are initially measured using an allocation of the purchase consideration using a relative fair value approach.

The useful lives of intangible assets are assessed as either finite or indefinite. The Company does not have any indefinite life intangible assets. Intangible assets with finite lives are amortized over their useful economic lives and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the remaining amortization period or method, as appropriate, and are treated as changes in accounting estimates. Useful lives and the recoverable amount of intangible assets depend on management's estimates and require judgement.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the condensed interim consolidated statements of loss and comprehensive loss when the asset is derecognized.

#### Goodwill and intangible asset impairment

The Company performs an annual test for goodwill impairment in the fourth quarter for each of the cash generating units (CGUs with goodwill allocated), and whenever events or circumstances make it more likely than not that an impairment may have occurred, such as a significant adverse change in the business climate or a decision to sell or dispose all or a portion of a reporting unit. Determining whether an impairment has occurred requires valuation of the respective CGU, which is estimated using a discounted cash flow method. When available and as appropriate, the comparative market multiple is used to corroborate discounted cash flow results. In applying this methodology, a number of factors, including actual operating results, future business plans, economic projections and market data. The Company tests intangible assets with indefinite lives annually for impairment using a fair value method such as discounted cash flows.

### 3. Maricann's reverse takeover ["RTO"]

On March 3, 2017, the Company entered into a definitive agreement with Maricann Inc. to combine Maricann Inc. and Danbel via the amalgamation of a wholly-owned subsidiary of Danbel ["Danbel Subco"] and Maricann Inc. which constituted a reverse takeover of Danbel. The resulting company [the "Resulting Issuer"] continues to operate as Maricann Group Inc., and trades publicly on the Exchange under the symbol "MARI".

The agreement setting out the terms of the transaction, included the following:

- The outstanding liabilities of Danbel were settled by way of issuing 5,500,000 shares of Danbel prior to the consolidation of shares by Danbel;
- (ii) All outstanding options of Danbel were exercised prior to the consolidation of shares. Total number of options outstanding were 360,000 options with an exercise price of \$0.05 per share. These were exercised by December 31, 2016, and converted into Danbel common shares;
- (iii) Prior to the transaction, Danbel consolidated its share capital on a 9.22-to-1 basis [the "Consolidation"]. The total number of Danbel shares outstanding is 11,527,716 Pre-Consolidation. Post-Consolidation, total number of Danbel shares was 1,250,279;
- (iv) 22,500 units ["Units"] with each Unit comprised of one senior unsecured convertible debenture with a principal amount of \$1,000 [a "Debenture"] and 500 common share purchase warrants [the "Warrants"] of Maricann Inc. were automatically converted into 22,500,000 common shares of Maricann prior to the RTO. 11,250,000 warrants associated with the Units were exchanged for 11,250,000 post-consolidation warrants of the Resulting Issuer;
- (v) 900,000 Compensation Options of Maricann Inc. were exchanged for 900,000 post-Consolidation Compensation Options of the Resulting Issuer; and
- (vi) 3,720,695 common shares of Maricann Inc. were issued to a key employee of Maricann Inc. prior to the transaction [note 12[iv]].

In conjunction with the RTO transaction, on March 3, 2017, Maricann Inc. completed a financing of \$10,005,167, by issuing 3,510,585 shares of Maricann Inc. at \$2.85 per share. Maricann Inc. paid issuance costs of \$868,298 and issued 130,380 compensation options with an exercise price of \$2.85 per share.

On April 20, 2017, Maricann Inc. and Danbel Subco completed the amalgamation under the amalgamation agreement under the Business Corporations Act (Ontario).

Prior to the closing of the RTO:

- (i) The convertible debentures of 22,500 units, converted into 22,500,000 common shares of Maricann Inc.
- (ii) 3,720,695 common shares of Maricann Inc. were issued to a key employee. Related compensation expense of \$1,640,000 was recorded in the consolidated statements of loss and comprehensive loss for the year ended December 31, 2017.
- (iii) The outstanding liabilities of Danbel were settled by way of issuing 5,500,000 shares of Danbel, and Danbel consolidated its share capital on a 9.22-to-1 basis. The total number of shares outstanding of Danbel was 11,527,716 pre-consolidation. Post-consolidation, total number of shares outstanding of Danbel was 1,250,279.

# Notes to the condensed interim consolidated financial statements

[Unaudited, expressed in Canadian dollars unless otherwise noted]

Three and six months ended June 30, 2018 and 2017

Pursuant to the closing of the RTO:

- (i) Danbel issued 71,266,984 Post-Consolidation common shares of the Resulting Issuer to Maricann Inc. shareholders exchanged on a one (1) for one (1) basis;
- (ii) Danbel further issued 11,250,000 warrants, 4,819,036 stock options and other rights to acquire securities, 900,000 Compensation Options (convertible on exercise to 900,000 common shares, and 900,000 of warrants), and 130,380 Compensation Options (convertible on exercise into 130,380 common shares) in the capital of the Resulting Issuer to holders of warrants, stock options and other rights to acquire securities and compensation options of Maricann Inc. on a one (1) for one (1) basis with economically equivalent terms.

On closing of the RTO, the shareholders of Maricann Inc. held 71,266,984 (or 98%) of the common shares of the Resulting Issuer, while shareholders of Danbel held 1,250,279 (or 2%) of the common shares of the Resulting Issuer. Since Danbel did not meet the definition of a business under IFRS 3 – *Business Combinations* ("IFRS 3"), the acquisition was accounted for as the purchase of Danbel's assets by the Company. The consideration paid was determined as equity-settled share-based payment under IFRS 2, at the fair value of the equity of Maricann Inc. retained by the shareholders of Danbel based on the fair value of the Maricann Inc. common shares on the date of closing of the RTO, which was determined to be \$2.85 per share based on the most recent equity raise on March 3, 2017.

The Company recorded a listing expense of nil for the three and six months ended June 30, 2018, respectively (2017 - \$3,972,464 and \$4,486,850). The Company recorded a listing expense of \$4,486,850 in the consolidated statement of loss and comprehensive loss for the year ended December 31, 2017. The details of the listing expense are as follows:

	\$
Fair value of consideration paid:	-
1,250,279 common shares of Maricann at \$2.85 per share	3,563,295
Fair value of net assets of Danbel acquired by Maricann	(379)
	3,562,916
Other transaction costs:	
Professional fees	589,583
Filing and listing fees	334,351
RTO listing expense	4,486,850

The net assets of Danbel were included at their carrying value of \$379 which approximates their fair value as follows:

#### 4. Significant accounting policies

These condensed interim consolidated financial statements have been prepared following the same accounting policies used in the preparation of the audited financial statements of the Company for the year ended December 31, 2017.

#### New standards, interpretations and amendments adopted by the Company

The following new accounting standards applied or adopted during the period ended June 30, 2018 had no material impact on the condensed interim consolidated financial statements:

#### IFRS 9 Financial Instruments ["IFRS 9"]

IFRS 9 addresses classification and measurement of financial assets and replaces the multiple category and measurement models in IAS 39 for debt instruments with a new mixed measurement model having only two categories: amortized cost and fair value through profit or loss. IFRS 9 also replaces the models for measuring equity instruments and such instruments are either recognized at fair value through profit or loss or at fair value through other comprehensive income. The effective date of this standard was January 1, 2018. The Company has adopted this new standard as of its effective date on a retrospective basis with the exception of financial assets that were derecognized at the date of initial application, January 1, 2018. The 2017 comparatives were not restated. The new classification and measurement of the Company's financial assets are as follows:

#### (i) Equity instruments at fair value through other comprehensive income ("FVOCI")

This category only includes equity instruments, which the Company intends to hold for the foreseeable future and which the Company has irrevocably elected to so classify upon initial recognition or transition. Equity instruments in this category are subsequently measured at fair value with changes recognized in other comprehensive income, with no recycling of gains or losses to profit or loss upon derecognition. Equity instruments at FVOCI are not subject to an impairment assessment under IFRS 9.

## (ii) Amortized cost

This category includes financial assets that are held within a business model with the objective to hold the financial assets in order to collect contractual cash flows that meet the solely principal and interest ("SPPI") criterion. Financial assets classified in this category are carried at amortized cost using the effective interest method.

## (iii) Fair value through profit or loss

This category includes derivative instruments and quoted equity instruments which the Company has not irrevocably elected, at initial recognition or transition, to classify at FVOCI. This category would also include debt instruments whose cash flow characteristics fail the SPPI criterion or are not held within a business model whose objective is either to collect contractual cash flows, or to both collect contractual cash flows and sell. Financial assets in this category are recorded at fair value with changes recognized in profit or loss. The assessment of the Company's business models was made as of the date of initial application, January 1, 2018, and then applied retrospectively to those financial assets that were not derecognized before January 1, 2018.

#### (iv) Impairment of financial assets

The adoption of IFRS 9 has fundamentally changed the Company's accounting of impairment losses for financial assets by replacing IAS 39's incurred loss approach with a forward-looking expected credit loss ("ECL") approach. IFRS 9 requires the Company to record an allowance for ECLs for all debt financial assets not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Company expects to receive. The shortfall is then discounted at an approximation to the asset's original effective interest rate.

IFRS 15 Revenue from Contracts with Customers ["IFRS 15"]

IFRS 15 was issued by the IASB in May 2014 and specifies how and when revenue should be recognized based on a five-step model, which is applied to all contracts with customers. IFRS 15 became effective for annual periods beginning on or after January 1, 2018 with early adoption permitted. The Company has adopted this new standard as of its effective date using the full retrospective method of adoption, and have assessed no significant changes as a result of the adoption of this new standard on the current or prior periods.

Under IFRS 15, the revenue recognition model has changed from one based on the transfer of risks and rewards of ownership to the transfer of control. The Company's contracts with customers for the sales of dried cannabis and cannabis oil include one performance obligation. As the transfer of risks and rewards generally coincides with the transfer of control at a point in time, upon delivery, the timing and amount of revenue considering discounts, rebates, and variable consideration, recognized from this principal revenue stream has not changed as a result of the adoption of this new standard.

The following is the Company's revenue recognition policy in accordance with IFRS 15:

#### (i) Revenue recognition

Revenue is recognized at the transaction price, which is the amount of consideration to which the Company expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties. The Company's contracts with customers for the sales of dried cannabis and cannabis oil include one performance obligation. The Company has concluded that revenue from the sale of these products should be recognized at the point in time when control of the assets is transferred to the customer, generally on delivery.

Amendments to IFRS 2 Share-based Payment

Amendments to IFRS 2, *Share-based Payment* were issued in June 2016 and are effective for annual periods beginning on or after January 1, 2018, to be applied prospectively. The amendments clarify the effects of vesting and non-vesting conditions on the measurement of cash-settled share-based payments; provide guidance on the classification of share-based payment transactions with net settlement features for withholding tax obligations; and clarify accounting for modification to the terms and conditions of a share-based payment that changes the classification of the transaction from cash-settled to equity-settled.

IFRS Interpretation Committee ("IFRIC") Interpretation 22 Foreign Currency Transactions and Advance Consideration

IFRIC 22 "Foreign Currency Transactions and Advance Consideration" ("IFRIC 22") was issued in December 2016 and is effective for annual periods beginning on or after January 1, 2018 and may be applied retrospectively or

# Notes to the condensed interim consolidated financial statements

Three and six months ended June 30, 2018 and 2017

prospectively. IFRIC 22 addresses which foreign exchange rate to use to measure a foreign currency transaction when advance payments are made, or received and non-monetary assets or liabilities are recognized prior to recognition of the underlying transaction. IFRIC 22 does not relate to goods or services accounted for at fair value or at the fair value of consideration paid or received at a date other than the date of initial recognition of the non-monetary asset or liability, or to income taxes, insurance contracts or reinsurance contracts. The foreign exchange rate on the day of the advance payment is used to measure the foreign currency transaction. If multiple advance payments are made or received, each payment is measured separately.

# The Company has not applied the following new and revised IFRS standards that have been issued but are not yet effective:

IFRS 16 - Leases ["IFRS 16"]

In January 2016, the IASB issued IFRS 16, which specifies how an IFRS reporter will recognize, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with IFRS 16's approach to lessor accounting substantially unchanged from its predecessor, IAS 17. IFRS 16 is effective for annual reporting periods beginning on or after January 1, 2019, and a lessee shall either apply IFRS 16 with full retrospective effect or, alternatively, not restate comparative information but recognize the cumulative effect of initially applying IFRS 16 as an adjustment to opening equity at the date of initial application. Early adoption is permitted if IFRS 15 has also been adopted. The Company is in the process of evaluating the impact of IFRS 16 on its condensed interim consolidated financial statements.

#### IFRIC 23 Uncertainty over Income Tax Treatments

In June 2017, the IASB issued IFRIC 23, "Uncertainty over Income Tax Treatments" ("IFRIC 23"), to clarify the accounting for uncertainties in income taxes. The interpretation provides guidance and clarifies the application of the recognition and measurement criteria in IAS 12, *Income Taxes* when there is uncertainty over income tax treatments. The interpretation is effective for annual periods beginning on January 1, 2019. The Company is currently assessing the impact of IFRIC 23 on its condensed interim consolidated financial statements.

The Company does not capitalize any production costs including overheads to biological assets. All production costs related to biological assets are expensed as incurred and are included in production costs in the table above.

The Company capitalizes cost incurred after harvest to bring the products to their present location and condition in accordance with IAS 2 Inventories. The cost of inventories includes the fair value less cost to sell of the cannabis at harvest and costs incurred after harvest (such as quality assurance costs, fulfillment costs and packaging costs) to bring the products to their present location and condition.

Three and six months ended June 30, 2018 and 2017

Biological assets are measured at fair value less costs to sell until harvest. All production costs related to biological assets are expensed as incurred. All direct and indirect costs related to both biological assets and inventory are included in the 'cost of sales – production costs' line on the statements of loss and comprehensive loss except for depreciation expense which is disclosed as a separate line in the statements of loss and comprehensive loss and disclosed separately by class in the Property, plant and equipment note.

The fair value measurements for biological assets have been categorized as Level 3 fair values based on the inputs to the valuation technique used. The fair value was determined using an expected cash flow model which assumes the biological assets at the balance sheet date will grow to maturity, be harvested and converted into finished goods inventory and sold in the retail medical cannabis market or retail hemp flower market. The Company's method of accounting for biological assets attributes value accretion on a straight-line basis throughout the life of the biological asset from initial cloning to the point of harvest.

## Cannabis plants

The cannabis plant model utilizes the following significant assumptions:

	Assumption				
		•		mber 31, 2017	
		Range	Average	Range	Average
[i]	Weighted average of expected loss of plants until harvest [a]	24%	24%	8% - 31%	24%

<sup>[</sup>a] Weighted average of expected loss of plants until harvest represents loss via plants that do not survive to the point of harvest. It does not include any financial loss on a surviving plant.

These estimates are subject to volatility in market prices and a number of uncontrollable factors, which could significantly affect the fair value of biological assets in future periods.

<sup>[</sup>b] The estimated selling price (per gram) represents the average historical sales price for the Company's various strains sold as retail products.

The following table presents the effect of 10% positive change and 10% negative change on the fair valuation of cannabis plants biological assets as at June 30, 2018 and December 31, 2017.

Assumption	As at June 30, 2018		As at December 31, 201	
	10% positive change \$	10% negative change	10% positive change \$	10% negative change

Reasonable margin on after harvest costs to complete and sell	6,236	(6,236)	20,548	(20,548)

The Company estimates the harvest yields for medical cannabis at various stages of growth. As of June 30, 2018, it is expected that the Company's cannabis plants biological assets will yield approximately 315,630 grams [December 31, 2017 – 437,499 grams] of medical cannabis when harvested.

The Company's estimates are, by their nature, subject to change and differences from the anticipated yield will be reflected in the gain or loss on biological assets in future periods.

#### Hemp plants

The hemp plants model utilizes the following significant assumptions:

	Assumption:	June 30, 2018	December 31, 2017
[i]	Weighted average of expected loss of plants until harvest [a]	2%	-
[ii]	Expected yields for hemp plants (average grams per plant)	12.5 grams per plant	-

# 9. Acquisitions

(a) Acquisition of Nanoleaf Technologies Inc. [the "Acquisition"]

On October 27, 2017, the Company completed the acquisition of all the issued and outstanding shares of Nanoleaf Technologies Inc. ["Nanoleaf"]. Nanoleaf is a biotech company with licensing rights to patented nano-technology for ingestible cannabinoid delivery called VESIsorb ®. The transaction was accounted for as an asset acquisition.

The Company acquired all of the common shares of Nanoleaf for a total consideration of \$33,439,714 consisting of:

	φ
Consideration	
18,333,319 common shares <sup>(1)</sup>	24,566,648
Contingent consideration	7,273,066
Cash	1,600,000
	33,439,714

(1) The number of common shares issued to Nanoleaf shareholders in connection with the Acquisition is subject to adjustment in certain circumstances following closing, including if, on the date that is 179 days post-closing [the "Adjustment Calculation Date"], the volume weighted average price of Maricann common shares for the preceding 20-day period [the "Adjustment VWAP"] is less than \$2.10 per share, the Company will issue incremental shares to the Nanoleaf vendors ["Adjustment Shares"] in accordance with the following formula:

(\$38,500,000 / Adjustment VWAP) - Number of Closing Shares issued)

The Adjustment VWAP is subject to a minimum of \$1.40 per Maricann share, resulting in a maximum number of Adjustment Shares of approximately 9,200,000. During the six-months ended June 30, 2018, the Company issued 644,449 Adjustment Shares with a value of \$1,338,899 to the Nanoleaf shareholders, this value was reallocated from contributed surplus to share capital.

The initial 18,333,319 common shares issued pursuant to the acquisition agreement were valued based on the closing share price of the Company on October 27, 2017, which was \$1.34.

The contingent consideration was valued using a model to simulate the share price at the expiry date using the following parameters:

Time to expiry	0.49 years
Share price at onset	\$1.34
Volatility	68.9%
Risk free interest rate	1.25%

The model simulated multiple trials and the mean was used for purpose of valuing the contingent consideration which was recorded to contributed surplus as at December 31, 2017.

#### (b) Haxxon AG ["Haxxon"]

On May 10, 2018, the Company, through its wholly-owned subsidiary, Maricann B.V., completed the acquisition of Haxxon, a Swiss company that cultivates female hemp cannabis flowers, with less than 1% THC to the Swiss market. The Company acquired all of the issued and outstanding shares of Haxxon for aggregate consideration of \$9,476,109. The transaction was accounted for as a business combination.

Contingent consideration (1)	230,910
	9,476,109

<sup>&</sup>lt;sup>(1)</sup> Contingent consideration payable of \$230,910 represents the value of 132,707 common shares that are issuable after the second anniversary of the closing of the transaction, provided certain representations and warranties of the seller remain in good standing. The contingent consideration was recorded to contributed surplus on the condensed interim consolidated statement of financial position as at June 30, 2018 as the number of common shares issuable is fixed.

The allocation of the consideration to the fair value of the net assets acquired and liabilities assumed at the date of acquisition is as follows:

	\$
Cash	11,696
Prepaid expenses and deposits	85,385
Inventories	255,428

Property and equipment	594,141
Accounts payable and other payables	(193,839)
Goodwill	8,703,417
	9,476,109

Goodwill represents expected synergies, estimated income, future growth, and other intangibles that do not qualify for separate recognition. The Company estimates \$nil goodwill to be deductible for tax purposes.

[i] In December 2017, the Company entered into an exclusivity agreement [the "RD Agreement"] with Rare Dankness LLC ["RD"] to bring certified strains and cannabis products to Canada. The RD Agreement provides the Corporation with exclusive distribution and retail rights for the Canadian markets for specified Rare Dankness Genetics and Products for a five-year term, subject to the Company meeting minimum wholesale targets each year or paying an exclusivity fee and a right of first refusal to act as RD's exclusive distributor for such products in Europe. The RD Agreement is subject to a one-time non-refundable payment of USD\$500,000 [\$627,530], which was paid as at June 30, 2018. RD shall be entitled to 50% of all profits on wholesale sales of products by the Company. Additionally, the Company is to issue three tranches of \$250,000 in common share purchase options on execution of the RD Agreement and on each of the first and second anniversaries. The first tranche has been issued as at June 30, 2018. The Company has capitalized the fair value of the three \$250,000 tranches using a discount rate of 18%. The exercise price of such options will be equal to the greater of the price of Maricann common shares at market close on the principal exchange on which the common shares trade on the date of issuance or the day prior to the date of issuance. Options shall vest on the date that is four months following the issuance date. The Company has capitalized \$1,227,530 to intangible assets, of which \$650,000 has correspondingly been recorded as an increase to contributed surplus in 2017 representing the present value of the \$750,000 of common share purchase options to be issued.

#### Share options

The Company has established a stock option plan [the "Option Plan"] for directors, officers, employees and consultants of the Company. The Company's Board of Directors determines, among other things, the eligibility of individuals to participate in the Option Plan and the term, vesting period, and the exercise price of options granted to individuals under the Option Plan.

Each share option converts into one common share of the Company on exercise. No amounts are paid or payable by the individual on receipt of the option. The options carry neither rights to dividends nor voting rights. Options may be exercised at any time from the date of vesting to the date of their expiry.

The Company's Option Plan provides that the number of common shares reserved for issuance may not exceed 10% of the aggregate number of common shares that are outstanding unless the Board of Directors shall have increased such limit by a resolution. If any options are exercised, terminate, expire, or are cancelled as contemplated by the Option Plan, the number of options so exercised, terminated, expired, or cancelled shall again be available under the Option Plan.

events. In the event the Issuer has not received a receipt from the Securities Commissions for the Qualifying Prospectus before October 4, 2018, each unexercised Special Warrant will thereafter entitle the holder to receive upon the exercise thereof, at no additional consideration, 1.05 Units (instead of one Unit). In connection with the August SW Offering, the agents received a cash commission and 930,680 compensation warrants. Each compensation warrant entitles the holder thereof to acquire one Unit at a price of \$1.60 per Unit until August 10, 2020, subject to adjustment in certain events. In connection with the completion of the offering, two officers entered into securities lending agreements pursuant to which they lent (together, the "Loans") two of the subscribers in the offering an aggregate of 2,708,000 freely-tradeable common shares (the "Loaned Shares") until the date that is four months and one day following closing of the offering (the "Securities Lending"). As collateral for the Securities Lending, the borrowers of the Loaned Shares have pledged a total of 2,708,000 Special Warrants which they acquired in connection with the Offering. In connection with the provision of the Loans, the Issuer has agreed to pay the officers an aggregate fee in an amount equal to \$216,640, to be allocated between such officers pro rata based on the number of Loaned Shares lent by each of them pursuant to the Securities Lending.

• Subsequent to June 30, 2018, the Company acquired all of the outstanding shares of Proimaging AG ("Proimaging"), a corporation incorporated in Switzerland. Proimaging's sole asset is a proposed clean-room cultivation, processing and extraction plant located in Ebersbach, Germany. The total purchase price paid was €3,000,000, which includes the assumption of all of the liabilities of Proimaging amounting to €1,016,463. As at June 30, 2018, the Company had paid a reservation fee and rent of €160,000 (\$233,582) which were deducted from the total purchase price per the terms of the share purchase agreement. The remaining purchase price of €2,840,000 (\$4,380,384) was paid subsequent to June 30, 2018.
