Recent Accounting Pronouncements

New standard IFRS 9 "Financial Instruments"

This new standard is a partial replacement of IAS 39 "Financial Instruments: Recognition and Measurement". IFRS 9 introduces new requirements for the classification and measurement of financial assets, additional changes relating to financial liabilities, a new general hedge accounting standard which will align hedge accounting more closely with risk management. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018 with early adoption permitted.

The Company has not early adopted these revised standards and is currently assessing the impact that these standards will have on its financial statements.

Other accounting standards or amendments to existing accounting standards that have been issued but have future effective dates are either not applicable or are not expected to have a significant impact on the Company's financial statements.

Capital Management

The Company's objectives when managing capital are to maintain adequate levels of funding to safeguard the Company's ability to continue as a going concern and to maintain its operations. Funds are primarily secured through loans from directors and companies controlled by directors.

The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There were no changes in the Company's approach to capital management during the year ended August 31, 2017. The Company is not subject to externally imposed capital requirements.

Financial Instruments

The Company is exposed to certain financial risks as listed below. There has been no change in the exposure to risk, nor its objectives, policies and process for managing the risk from the prior year.

Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash. The Company has no significant concentration of credit risk arising from operations. Cash is held with a reputable financial institution, from which management believes the risk of loss to be minimal.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company currently settles its financial obligation from available cash. The ability to do this is dependent on loans from directors and companies controlled by directors.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates and foreign exchange rates.

Interest rate risk

The Company has cash balances and non-interest bearing debt. The Company's current policy is to invest excess cash in guaranteed investment certificates, bankers acceptance and money market deposits, with reputable financial institutions. The interest rate risk is remote.

Foreign currency risk

The Company's functional and reporting currency is the Canadian dollar and major purchases are transacted in Canadian dollars. The Company does not hold any balances in foreign currencies to give rise to exposure to foreign exchange risk.

Risks and Uncertainties

The Company has no source of operating cash flow and no assurance that additional funding will be available. Although the Company has been successful in the past in obtaining financing through the sale of equity securities, there can be no assurance that the Company will be able to obtain adequate financing in the future or that the terms of such financing will be favourable.

The Company is very dependent upon the personal efforts and commitment of its existing management. To the extent that management's services would be unavailable for any reason, a disruption to the operations of the Company could result, and other persons would be required to manage and operate the Company. The Company has not purchased "key-man" insurance, nor has it entered into non-competition and non-disclosure agreements with management and has no current plans to do so.

Disclosure of Internal Controls

Management has established processes to provide them sufficient knowledge to support representations that they have exercised reasonable diligence that (i) the financial statements do not contain any untrue statement of material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it is made, as of the date of and for the periods presented by the financial statements; and (ii) the financial statements fairly present in all material respects the financial condition, results of operations and cash flows of the Company, as of the date of and for the periods presented.
